

Maximize Efficiency with MyCarrierPortal & EZ Loader Integration

MyCarrierPortal + EZ Loader

Revolutionizing Freight Brokerage Operations Together

MyCarrierPortal is delighted to unveil its strategic collaboration and seamless integration with EZ Loader a cloud-based Transportation Management System (TMS) tailored specifically for freight brokers. Together, we're revolutionizing freight brokerage operations. Here's why this partnership is a game-changer:

EZ Loader TMS is meticulously crafted for freight brokers, offering:

- A comprehensive management platform catering to Operations, Sales, and Accounting needs.
- A user-based cost model with enterprise-grade options, ensuring affordability and scalability.
- Robustness, cost-effectiveness, and a user-friendly interface for maximum scalability.

EZ Loader TMS stands out with its commitment to brokerage needs:

- Developed through years of brokerage needs analysis and crowd-sourced development.
- Focused solely on providing freight brokerages with the best total transportation management solution.
- Round-the-clock support, process consultations, and continuous improvement to future-proof your business.

Experience enhanced efficiency and streamlined processes with:

- Seamless integration between MyCarrierPortal and EZ Loader for optimized operations.
- Leveraging MyCarrierPortal's carrier vetting and compliance solutions within EZ Loader TMS.
- Unlocking new levels of productivity and scalability for freight brokerages.
