

CARRIER MATCHED DATA

A sophisticated feature within our system designed to enhance your operational security and efficiency. With this functionality, our platform is equipped to promptly notify you whenever there's a match detected between a carrier's company address, telephone number, email, or fax with that of another carrier.

Carrier Matched Data is monitored in the risk assessment with a clear notice of data found with other carriers.

Stop fraud in its tracks! Avoid the risk of working with bad actors and losing a load with carrier Matching Data.

Matched Data is quick and easy to use. Find additional information within seconds.
